AI VISIBILITY REPORT

Omega Services

How often AI assistants recommend your business to local customers

{Suburb, STATE} · {Vertical} · Week 44, 2026 (26 Oct – 1 Nov)

17%

Visibility. Mentioned in **5 of 30** answers to everyday customer questions across ChatGPT, Gemini and Perplexity.

Audit #37 · 31 Oct 2026 | 3 of 4 engines answered | 95% CI 7–34%

01 · EXECUTIVE SUMMARY

MEASURED · AUDIT #37

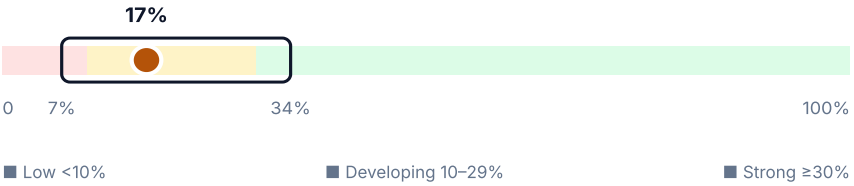

AI mentions Omega Services in about 1 in 6 everyday answers

We asked AI engines the questions local customers ask, without naming your business, and counted how often you were recommended.

VISIBILITY

17%

Mentioned in **5 of 30** answers

The box shows the 95% confidence interval (7–34%): with 30 answers, the true rate is very likely in this range.

! **This audit is based on 3 of 4 engines.** Claude returned an error for all 13 questions (provider spend limit reached), so its answers aren't counted. Visibility uses the 30 answers from ChatGPT, Gemini and Perplexity.

YOUR DIRECTORY PROFILES CITED

0 of 36

directory citations by AI

The picture, in plain English

When local customers ask AI for help with the kind of work Omega Services does, Omega comes up in **about 1 in 6 answers**: 5 of the 30 we counted. When it does appear, it's **typically listed first**, and every mention linked a source.

The engines don't agree. **Perplexity** mentioned Omega in 3 of 10 answers and **ChatGPT** in 2 of 10, while **Gemini didn't mention it at all**. Claude couldn't be measured this time.

AI leans heavily on directories, citing seven of them 36 times, but **none of those citations linked Omega's own listings**. That is the clearest, most fixable gap in this report (see section 04).

Every sentence is built from the measured figures on this page; no numbers are estimated.

02 · ENGINE BY ENGINE

MEASURED · AUDIT #37

Which AI engines recommend you

Mentions in successful answers to the 10 everyday questions. Failed answers are shown but never counted.

ChatGPT		20% 2 of 10
Claude	Provider spend limit reached (a monthly limit set in the provider's console)	Not counted 13 errors
Gemini		0% 0 of 10
Perplexity		30% 3 of 10

Question by question

Each square is one AI answer. Final PDF shows the real question text (truncated to one line) and the real outcome per answer.

Prototype: per-engine totals match Audit #37; which question each mention belongs to is placeholder layout only.

03 · WHERE AI LOOKS

MEASURED · AUDIT #37

The directories AI trusts, and whether it found you there

Out of 30 answers to everyday customer questions. A directory counts once per answer that cites it.

DIRECTORY CITATIONS BY AI

36

across 7 directories in 30 answers

CITATIONS OF YOUR PROFILE

0

AI didn't link any of your directory listings

DIRECTORY	CITED IN ANSWERS	COUNT	YOUR PROFILE
hipages		9 of 30	0 cited
Word of Mouth		8 of 30	0 cited
Localsearch		7 of 30	0 cited
Airtasker		5 of 30	0 cited
Yellow Pages		5 of 30	0 cited
ProductReview		1 of 30	0 cited
True Local		1 of 30	0 cited

AI engines cited hipages, Word of Mouth and Localsearch in **24 of 36** directory citations. A complete, active profile on these three is the most direct way to be the listing AI links to.

Competitors

No competitors were configured for this brand, so share of voice isn't shown.

When competitors are added, this section ranks you against them using the same answers.

04 · DIAGNOSIS

MEASURED · AUDIT #37

Why AI isn't recommending you more, and what's working

Each finding shows the evidence from this audit, then the fix.

Your directory listings aren't the ones AI links

HIGH IMPACT

AI engines answer local questions by citing directories. They cited seven directories 36 times, but never your profile on any of them.

```
EVIDENCE · AUDIT #37 · 30 EVERYDAY ANSWERS
hipages   → cited in 9 of 30 answers · your profile: 0
Word of Mouth   → cited in 8 of 30 answers · your profile: 0
Localsearch   → cited in 7 of 30 answers · your profile: 0
```

- ✓ **Complete and activate your profiles on these three directories first**

Gemini doesn't mention you

HIGH IMPACT

Two engines recommend you some of the time; Gemini didn't mention you in any of its answers.

```
EVIDENCE · MENTIONS PER ENGINE, EVERYDAY QUESTIONS
Gemini     → 0 of 10
ChatGPT    → 2 of 10
Perplexity → 3 of 10
```

- ✓ **Review your Google Business Profile: categories, services, hours and recent reviews**

Claude couldn't be measured this time

RE-RUN

Every Claude request failed for a provider reason, so we don't yet know how Claude sees you.

```
EVIDENCE · ENGINE COVERAGE
Claude   → 13 of 13 errors · provider spend limit reached · not counted
```

- ✓ **Re-run the audit with all four engines for a complete baseline**

When you're mentioned, you're listed first

STRENGTH

Every time AI recommended you, it put you at the top of its list and linked a source. That's a strong position to build on.

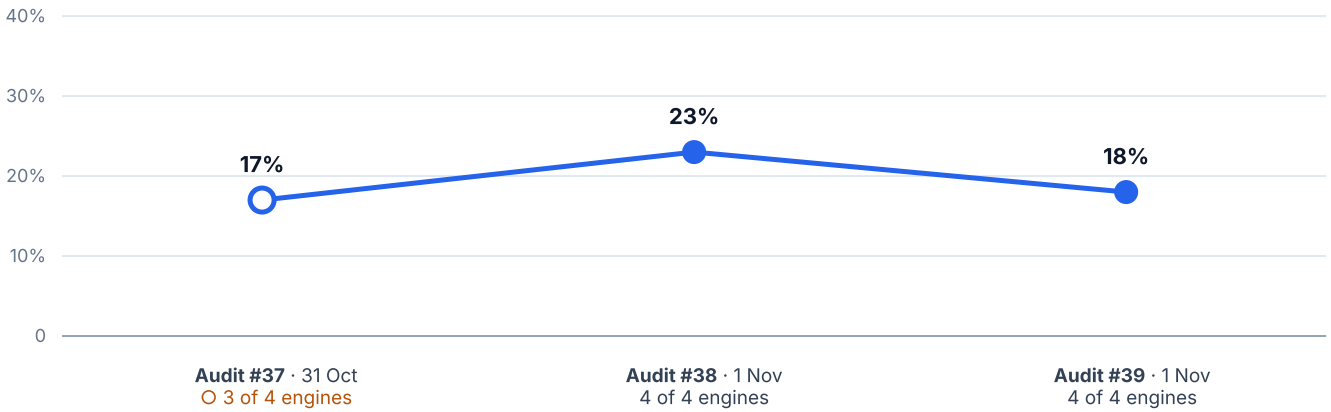

```
EVIDENCE · YOUR 5 MENTIONS
Ranked list   → 5 of 5 · typically #1
Source linked → 5 of 5
```

- ✓ **Keep the pages AI already cites up to date: they're doing the work**

05 · OVER TIME

MEASURED · AUDITS #37–#39

Visibility across recent audits

Hollow points used fewer engines and aren't compared with full audits. Not enough comparable audits for a trend yet (minimum {N}); figures are shown as measured, without a trend claim.

06 · RECOMMENDED NEXT

FROM FINDINGS IN SECTION 04

Prioritised by impact

We don't project score gains: AI answers vary, and we only report what we measure. Progress shows up in your next audits.

1. **Complete your hipages, Word of Mouth and Localsearch profiles** — Finding 1 · High
   They're cited in 24 of 36 directory citations; none linked you.
2. **Strengthen your Google Business Profile** — Finding 2 · High
   Gemini mentioned you in 0 of 10 answers.
3. **Re-run with all four engines** — Finding 3 · Re-run
   Claude wasn't measured in this audit.
4. **Keep your cited pages current** — Finding 4 · Strength
   All 5 mentions linked a source and ranked you #1.

07 · METHOD AND NOTES

How these numbers were measured

What we asked

13 questions per engine: 10 everyday questions a local customer would ask (they don't name your business) and 3 branded questions. **Visibility uses the everyday questions only.**

What counts as a mention

Your business is named in the answer and verified against your business details. Similar names that don't match aren't counted.

What's excluded

- Answers that failed (errors are shown, never counted)
- Branded questions, from the headline
- Engines that failed every question, from comparisons over time

Audit details

Audit	#37 · 31 Oct 2026 · 2m 55s
Method	Web-grounded (v2)
Answers	52 planned · 39 answered · 13 failed
Engines	ChatGPT {model}, Claude {model}, Gemini {model}, Perplexity {model}
Location	{Suburb, STATE}

Glossary

Visibility
The share of everyday answers that mention you. 17% = 5 of 30.

95% confidence interval
The range the true rate very likely falls in, given how many answers we have. More answers give a narrower range.

Typical position
Your median rank when an answer lists several businesses.

Source cited
How many of your mentions linked to a web page as their source.

Directory citation
An answer that links a directory page (e.g. hipages). "Your profile" means the link goes to your own listing.

Good to know

AI answers change over time and by location. A single audit is a snapshot; regular audits show the direction.

Data residency

Your account data is stored in Australia. This report is stored in Sydney (AWS ap-southeast-2).

Generated 1 Nov 2026, 6:59 pm AEDT by Vunnara for Splice Marketing. Figures come from the audit records listed above and match the Vunnara dashboard.
